PROFESSIONAL SUMMARY

Data and Operations Analyst with 3+ years of experience in AI-enabled data operations and document processing for US insurance, mortgage, and banking clients, plus hands-on analytics skills in SQL, Power BI, Excel, and Python. Skilled at translating business requirements into structured data workflows, dashboards, and actionable recommendations. Ranked 3rd in the Codebasics: Data Analysis Resume Project Challenge. Microsoft Certified Power BI Data Analyst Associate (PL-300). Seeking to deepen expertise in machine learning, predictive analytics, and AI applications.

TECHNICAL SKILLS

- Data Analysis & Programming: SQL (MySQL), Python (fundamentals), Statistics, Data Cleaning
- Visualisation & BI: Power BI (DAX, Power Query, Data Modeling), Microsoft Excel (PivotTables, Slicers, Formulas, Dashboards)
- AI & Document Processing: Intelligent Document Processing (IDP), Document Classification, Data Extraction and Versioning, UAT
- Business Skills: Requirement gathering, Root Cause Analysis, Stakeholder Communication, SOP Development, AS-IS and TO-BE Process Analysis

PROFESSIONAL EXPERIENCE

Infrrd Pvt. Ltd. (employed via Cosmonet AI) | Data Processing Executive May 2024 – Present

Auto Insurance Project – State National (US client)

- Attended client meetings with cross-functional teams to understand business requirements, then discussed them with technical teams and product managers to plan the Intelligent Document Processing (IDP) product.
- Contributed to the end-to-end development of the live IDP product for document classification and data extraction on auto insurance documents.
- Developed SOPs and process documentation, and trained a team of 8 on extraction workflows, business rules, and quality standards.
- Monitored the IDP workflow from start to finish and recommended product and process improvements to the technical team and product manager.

US Mortgage Project – Multiple clients

- Collaborated with clients, underwriters, and technical and AI/ML teams across requirement gathering, IDP configuration, and multi-stage UAT and production phases.
- Worked as a pre-underwriting analyst, training the model on data extraction and performing document classification, versioning, and document tagging.
- Supported UAT by validating workflow behaviour against business requirements, documenting issues, coordinating fixes with QA and development teams, and verifying them before production.
- Performed root cause analysis on recurring extraction and workflow issues to improve accuracy.

Banking Project – Laminr (US client)

- Performing document data extraction on live SLA-bound workflows for a US banking client, meeting turnaround and quality targets.
- Participated in daily stakeholder reviews to track open issues and coordinate action items.

AIMonk Labs Pvt. Ltd. | Annotation Executive Apr 2023 – Mar 2024

- Performed annotation and quality validation across image, text, and document datasets for AI and machine learning projects, following defined business rules and quality standards.
- Collaborated with QA teams and ML engineers to clarify annotation guidelines, investigate error and rejection patterns, and improve dataset consistency and model performance.

- Prepared annotation guidelines and process documentation, and onboarded new team members on workflows and quality standards.
- Consistently met productivity, quality, and turnaround SLAs on client projects.

ANALYTICAL PROJECTS

Consumer Engagement & Market Insights Dashboard Power BI, MySQL

- Analysed survey data from 10,000 respondents across 10 Indian cities using MySQL (data cleaning, joins, aggregations, KPI analysis) to identify consumer preferences, brand awareness drivers, and market opportunities for an energy beverage launch.
- Built an interactive Power BI dashboard segmenting consumers by demographics, consumption behaviour, product preferences, and purchase factors to support data-driven marketing and product decisions.
- Translated findings into recommendations on target-market selection, brand positioning, product strategy, and marketing channels; ranked 3rd in the Codebasics Resume Project Challenge.

Credit Card Transaction Analysis MySQL, Excel

- Analysed a large credit card transaction dataset in MySQL to uncover spending patterns, customer behaviour, transaction trends, and key revenue-generating segments.
- Applied advanced SQL (CTEs, window functions, subqueries, CASE statements, ranking functions) to evaluate performance across customer demographics, transaction categories, cities, card types, and time periods.
- Developed a structured report and presentation translating transaction-level data into business insights and actionable recommendations.

Sales Dashboard Microsoft Excel

- Cleaned and analysed sales data using Excel formulas, functions, and PivotTables to evaluate bike sales across regions, customer demographics, occupations, income levels, and commute distances.
- Built an interactive dashboard with PivotTables and slicers for dynamic analysis of sales across Europe, North America, and the Pacific.
- Identified customer segments by age, income, occupation, marital status, and commute distance to support target-market identification and sales strategy.

EDUCATION

Jadavpur University, Kolkata, India 2019 – 2022

Bachelor of Science (Honours) in Textile Science, Clothing and Fashion Studies | CGPA: 9.43 / 10

CERTIFICATIONS & ACHIEVEMENTS

- Microsoft Power BI Data Analyst Associate (PL-300) | Microsoft
- Codebasics Data Analysis Resume Project Challenge | Ranked 3rd | Codebasics
- Power BI Data Analyst Professional Certificate | Coursera
- Statistics for Data Science and Business Analysis | Udemy (365 Careers)
- The Complete Python Bootcamp: From Zero to Hero in Python | Udemy (Jose Portilla, Pierian Training)
- SQL Beginner to Advanced for Data Professionals | Codebasics (scored 70%+)
- SQL (Basic) Skill Certificate | HackerRank
